// Traditional Project Coordination

// Ideal Project Coordination

// Data as a Discipline™

...the practice of identifying, leveraging, and auditing data to drive planning, design, construction, and operations.

// Initial Solutions for Building Owners

Data Consulting

- Translate owner project requirements into data so that planning phase can inform design and construction
- Leverage building information modeling to collect asset information from design and construction
- Develop strategic initiatives to drive an organization or project to be data-driven

The Convergit™ Data Platform

- Cloud-base web application with Revit integration
 - Insert pertinent project data into a model with single click
 - Manage/edit data in bulk, from a central location
 - Review project data, in real time, to ensure it is complete and correct
